

Attendance Management System

Khiromani Bai-181110316th semester Biomedical Engineering

DISADVANTAGES OF PRESENT WORKING SYSTEM:- Not

User Friendly:- The existing system is not user friendly because the retrieval of data is very slow and data is not maintained efficiently.

Difficulty in report generating:- We require more calculation to generate the report so it is generated at the end of the session. And the student not get a single chance to improve their attendance.

Manual Control:- All calculation to generate report is done manually so there is greater chance of errors.

Lots of paperwork:- Existing system requires lot of paper work.

- Loss of even a single register/record led to difficult situation because all the papers are needed to generate the reports.

Time consuming:- Every work is done manually so we cannot generate report in the middle of the session or as per the requirement because it is very time consuming.
